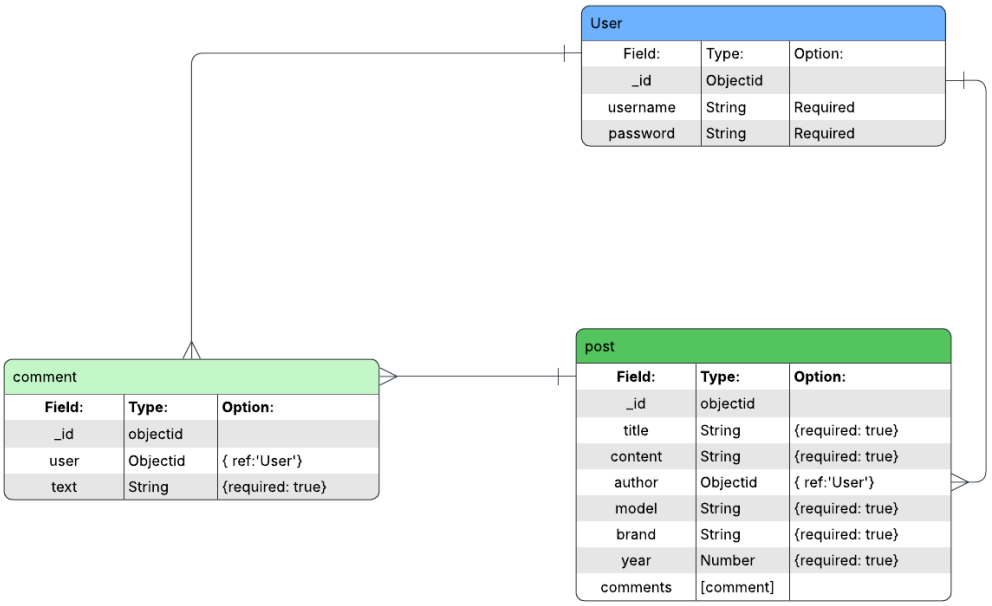
MotorNotes

Idea:

A automotive blog website where users can view the vehicles reviews posts and comments and they can create new review posts. The site uses authentication, Full CRUD, MongoDB both embedded and reference documents.

- **User Stories:**
    1. **As user I want to be sign-in/up**
    2. **As user I want to be able to create posts**
    3. **As user I want to be able to see all other users' posts**
    4. **As user I want to be the only person that is allowed to edit my own posts**
    5. **As user I want to be able to update my posts**
    6. **As user I want to be able to delete my posts**
    7. **As user if I do some action, I want to get visual feedback and pop-up messages**

ERD:



if the user post and comments functionality done will seperate vheicle as collection
